Experience

Physical Intelligence

May 2026 – Present

Robot Operator

San Francisco, CA

- Perform quality control testing on robotic systems by executing structured task protocols, evaluating AI model outputs against performance benchmarks, and identifying failure modes, edge cases, and inconsistencies in robot behavior across manipulation, sorting, and assembly tasks.
- Evaluate and validate AI-driven robot performance through systematic review and annotation of task execution videos, ensuring training data meets quality thresholds for foundation model development. Generate high-quality demonstration data by teleoperating robotic arms through diverse real-world tasks with precision and consistency.

Handshake AI

April 2026 – June 2026

Contracted AI Response Evaluator

Remote

- Evaluate LLM-generated code and technical responses across AI/ML and software engineering domains (C#/.NET, Python, ML systems), scoring on correctness, instruction following, and writing quality.

Kaiser Permanente Regional Laboratory

Oct 2023 – June 2024

Software Developer

Berkeley, CA

- Developed full-stack web application using React, Express, RESTful APIs, and SQL for uploading, processing, and viewing clinical lab instrument data across multiple departments.
- Built secure data pipelines with input validation and error logging for laboratory information systems, consolidating a manual data entry process across 50+ instrument data columns into an automated upload workflow.
- Collaborated directly with lab technicians and clinical staff to gather requirements, conduct demos, and iterate on features based on end-user feedback.

Projects

CareerTuner.org | OpenAI GPT-4, React, Node.js, Supabase, Tailwind, PDFKit

- Built and deployed AI-powered resume analyzer integrating OpenAI API for intelligent feedback, ATS scoring, and skills gap analysis. 500+ users.
- Implemented RAG pipeline for context-aware resume suggestions based on job descriptions with PDF export via PDFKit.

MedStrat.net | Python, Flask, PubMed API, NLP, JavaScript, Chart.js, ReportLab, Vercel

- Built full-stack biomedical research tool with a Flask REST API that searches PubMed's 36M+ article database with rate limiting and caching for reliable performance.
- Designed a custom NLP pipeline that rewrites research summaries. Includes PDF export, citation generation in 4 formats, and publication trend charts.

Castline Studio Order System | Next.js 14, TypeScript, WebAssembly, Vercel, REST APIs

- Built order management web app with Next.js 14 (App Router, TypeScript) featuring real-time STL file analysis via a custom WebAssembly/JavaScript parser to calculate volume, dimensions, and print cost client-side.
- Powers a \$2K+/month e-commerce business with product listings and a fully automated order pipeline.

Research Publications

Brain Tumor Classification with Pretrained CNNs in PyTorch | 7,000+ MRI, ResNet-18 | DOI

Efficient Packaging and Deployment of AI Models for Edge Inference | DOI

Transferability of Adversarial Attacks Across ML Models | DOI

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, C++, Java, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express, Flask, RESTful APIs, Docker, Git, CI/CD

AI/ML: OpenAI API, LangChain, PyTorch, HuggingFace, RAG Pipelines

Data & Cloud: PostgreSQL, MongoDB, Supabase, Vercel, AWS, Google Cloud, DICOM, HL7/FHIR

Other: WebAssembly, OAuth 2.0, Pandas, NumPy, OpenCV

Education

Grand Canyon University <i>MS in Computer Software Engineering</i>	May 2024 – Oct 2025 Phoenix, AZ
University of Silicon Valley <i>BS in Computer Science</i>	May 2021 – Aug 2023 San Jose, CA

Certifications

AWS Solutions Architect Associate (Apr 2026)	HackerRank Software Engineer Certificate (Mar 2026)
Cisco Network Support and Security (Sep 2025)	IBM Artificial Intelligence (Aug 2025)
Stanford AI/ML in Healthcare (Jun 2025)	Google Project Management (Sep 2024)
